

Licence No. 1126

**ADELAIDE BRIGHTON CEMENT
LIMITED**

ISSUED:
01 Nov 2022

EXPIRY:
31 Oct 2027

ACN:
007 870 199

Environmental Authorisation
under Part 6 of the
*Environment Protection
Act 1993*

**South Australian
Environment
Protection Authority**
GPO Box 2607
Adelaide SA 5001
Tel: 08 8204 2004

EPA

Environment Protection Authority

LICENCE NUMBER 1126

LICENSEE DETAILS

Licence Holder: ADELAIDE BRIGHTON CEMENT LIMITED
ACN: 007 870 199
Registered Address: Level 4/151 Pirie Street, ADELAIDE SA 5000

LICENSED ACTIVITIES

The Licensee is authorised to undertake, at the location(s) shown above, the following prescribed activities of environmental significance under Schedule 1 Part A of the Act, subject to the conditions in this Licence.

2(3)	Cement works
3(5)(a)	Activity producing listed waste
7(1)	Bulk shipping facilities
7(3)(c)	Crushing, grinding or milling works (rock, ores or minerals)
8(2)(a)	Fuel burning coal or wood
8(2)(a)	Fuel burning not coal or wood

TERMS OF LICENCE

Commencement Date: 01 Nov 2022
Expiry Date: 31 Oct 2027
Amended Date: 20 Nov 2023

PREMISES ADDRESS

Victoria & Elder Roads, PETERHEAD SA

Licence Explanatory Notes – Do Not Form Part of the Licence

Compliance with this licence

The EPA seeks to ensure that all reasonable and practicable measures are taken to protect, restore and enhance the quality of the environment according to the principles of ecologically sustainable development. To achieve this objective, the EPA uses a number of regulatory decision making principles and actions outlined in the 'Compliance and enforcement regulatory options and tools' document available on the EPA website.

Notification – serious or material environmental harm caused or threatened

If serious or material environmental harm from pollution is caused or threatened in the course of an activity, the licence holder must, as soon as reasonably practicable after becoming aware of the harm or threatened harm, notify the EPA (preferably on EPA emergency phone number 1800 100 833) of the harm or threatened harm, its nature, the circumstances in which it occurred and the action taken to deal with it in accordance with section 83 of the [Environment Protection Act 1993](#) (the Act). In the event that the primary emergency phone number is out of order, the licence holder should phone (08) 8204 2004.

Variations, transfers and surrender of a licence

The EPA may impose or vary the conditions of a licence by notice in writing to the licence holder in accordance with sections 45 and 46 of the Act. Public notice may be required where the variation of licence conditions results in a relaxation of the requirements imposed for the protection or restoration of the environment and results in an adverse effect on any adjoining land or its amenity.

If a licence holder wishes to vary the conditions of a licence, transfer a licence to another entity, or surrender a licence, the licence holder must submit an application to the EPA in accordance with the applicable provisions of the Act (sections 45, 49 and 56, respectively). A licence remains in effect and in its original form until such time as any proposed variation, application for surrender, or transfer has been made and approved in writing by the EPA.

Suspension or cancellation of a licence

The EPA may suspend or cancel a licence by notice in writing to the licence holder in accordance with section 55 of the Act if satisfied the licence holder has either obtained the licence improperly, contravened a requirement under the Act or if the holder is a body corporate, a director of the body corporate has been guilty of misconduct of a prescribed kind (whether in this State or elsewhere).

Responsibilities under Environment Protection legislation

In addition to the conditions of any licence, a licence holder must comply with their obligations under all State and Federal legislation (as amended from time to time) including: the [Environment Protection Act 1993](#); the [Environment Protection Regulations 2009](#); all Environment Protection Policies made under the [Environment Protection Act 1993](#); and any National Environment Protection Measures not operating as an Environment Protection Policy under the [Environment Protection Act 1993](#)

Public Register Information

The EPA maintains and makes available a Public Register of details related to its determinations and other information it considers appropriate (i.e. excluding trade processes or financial information) in accordance with section 109 of the Act. These details include, but are not limited to:

- licensing and beverage container applications and approvals
- enforcement actions
- site contamination
- serious or material environmental harm caused or threatened in the course of an activity
- environment improvement programmes and environment performance agreements
- environment assessment reports; results of testing, monitoring or evaluation required by a licence
- EPA advice or direction regarding development approvals referred to the EPA by a planning authority

Definitions

Unless the contrary intention appears, terms used in this licence that are defined in the Act (including any regulations or environment protection policies made pursuant to the Act) have the respective meanings assigned to those terms by the Act.

THE ACT: The *Environment Protection Act 1993*

PREMISES: The whole of the land comprised in Titles Register - Certificate of Title, Crown Lease and Crown Record.

ACOUSTIC ENGINEER: means an Engineer who is eligible for membership of both the Institution of Engineers Australia and the Australian Acoustical Society.

AUTHORISATION FEE PAYMENT DATE: means the anniversary of the grant or renewal of this authorisation.

CERTIFIED TYPE B GAS APPLIANCE: means an appliance with a gas consumption in excess of 10 megajoules per hour which has been certified under the Gas Act 1997 as meeting the requirements of AS3814 and AS/NZS5601.

CONTAMINATED STORMWATER: is as defined in the Environment Protection (Water Quality) Policy 2015.

CONTROLLED WASTE: means any wastes of a category listed in Column 1 of the Table in Schedule 1 that has 1 or more characteristics listed in the Table in Schedule 2 of the Environment Protection (movement of Controlled Waste) Policy 2014.

DESTINATION FACILITY: 'Destination Facility' in relation to a consignment of controlled

waste means the depot, facility or works to which the waste is, or is to be delivered under the consignment.

EMERGENCY SPILL KIT: means a kit containing materials that when used would prevent and/or minimise listed waste from entering the stormwater or groundwater system in the event of a spill.

ENVIRONMENTAL HARM: means the same as is defined in section 5 of the Environment Protection Act 1993.

LISTED WASTE: means wastes listed in Part B of Schedule 1 of the Environment Protection Act 1993.

POLLUTION CONTROL EQUIPMENT: means 'control equipment' as defined in the Environment Protection (Air Quality) Policy: any device that controls, limits, measures, records or indicates air pollution.

RECOVERED PRODUCTS PLAN: means a written document that is approved by the EPA in accordance with Section 6 of the EPA 'Standard for the Production and Use of Refuse Derived Fuel,' dated February 2010.

REFUSE DERIVED FUEL: A fuel material produced from waste that is otherwise destined to landfill and which will not cause harm to the environment or human health when used to beneficially replace or supplement a fossil or other standard commercial fuel in an industrial process. RDF must be produced to an approved consistent and fit for purpose specification with sufficiently high net calorific value by segregating, targeting and processing specific wastes.

SUITABLY QUALIFIED EXPERT: means a person who holds relevant qualifications, has demonstrated professional experience and expertise encompassing an appropriate range of competencies, and is either a full member or is eligible for full membership of one or more of the following or equivalent professional organisations:

1. The Institution of Engineers Australia
2. The Association of Consulting Engineers Australia

WASTE: means -

1. As defined under the Environment Protection Act 1993,

1(a) any discarded, dumped, rejected, abandoned, unwanted or surplus matter, whether or not intended for sale or for purification or resource recovery by a separate operation from that which produced the matter; or

1(b) any matter declared by regulation to be waste for the purposes of this Act (following consultation by the Minister on the regulation with prescribed bodies in accordance with the regulations); or

1(c) any matter declared by an environment protection policy to be waste for the purposes of this Act,

whether or not of value.

2. However, waste does not include—

2(a) an approved recovered resource whilst it is being dealt with in accordance with the declaration of that resource—see section 4A; or

2(b) anything declared by regulation or an environment protection policy not to be waste for the purposes of this Act,

even though the resource or the thing so declared might otherwise, but for the declaration, fall within the definition of waste in subsection (1).

WASTEWATER: as defined in the Environment Protection (Water Quality) Policy 2015.

WATERS: is as defined in the Environment Protection (Water Quality) Policy 2015.

Acronyms

EPA: means Environment Protection Authority

AFRM: means Alternative Fuel and/or Raw Material.

STP: means standard temperature and pressure (zero degrees Celsius and 101.3 kiloPascals absolute).

TSP: means Total Suspended Particles.

WTC: means Waste Transport Certificate.

Conditions of Licence

The Licensee is authorised to conduct the prescribed activities as described in this Licence at the Premises nominated, subject to the following conditions:

1 CONTROL OF EMISSIONS

1.1 AIR PARTICULATE MANAGEMENT PLAN (U - 1549)

The Licensee must:

- 1.1.1 develop and submit to the satisfaction of the EPA an Air Particulate Management Plan by the compliance date listed below;
- 1.1.2 ensure that the Air Particulate Management Plan includes, but need not be limited to:
 - a specification of trigger values to prevent and minimise particulate emissions;
 - b specification of trigger values required by sub paragraph 2(a) of this condition should have regard to the following items:
 - i existing monitoring data;
 - ii data collected as part of conditions U-1555, U-1556;
 - iii meteorological conditions; and
 - iv visual observations, including the use of electronic and/or remote visual methods;
 - c detailed action and response strategies that will be taken when the trigger values, identified under sub paragraph 2(a) of this condition are reached, to prevent and minimise particulate emissions;
 - d a methodology and framework for providing public access to the Air Particulate Management Plan (or any revised plan approved by the EPA) and to quarterly and annual reporting;
- 1.1.3 submit a quarterly report to the EPA by the last day of January, April, July and October of each year that includes but need not be limited to:
 - a the date, time and trigger value exceeded;
 - b action and response strategies implemented;
 - c summary of events notified under condition U-765;
 - d a summary of air particulate related complaints received and recorded pursuant to condition U-1553;
- 1.1.4 submit an annual report to the EPA by the 15th day of February of each year, that includes but need not be limited to:
 - a a review of all the trigger values identified in sub paragraph 2(a) of this condition;
 - b a review of the effectiveness of all action and response strategies identified in sub paragraph 2(c) of this condition;
 - c a trend analysis of data collected;
 - d a review and analysis of complaints received and recorded pursuant to condition U-1553 with the exceedance of trigger values identified in sub paragraph 2(a) of this condition; and
 - e opportunities for improvement in air particulate management;

- 1.1.5 implement the Air Particulate Management Plan approved in writing by the EPA (or any revised plan approved in writing by the EPA).

Compliance Date: 30-May-2023

1.2 GROUND LEVEL PARTICULATE NOTIFICATION (U - 765)

The Licensee must:

- 1.2.1 provide notification to the EPA, within 48 hours, when the following particulate limits are exceeded at any of its monitoring locations outside the Premises:
- a a PM10 concentration of 50 micrograms per cubic metre over a 24 hour averaging period; or
 - b a PM2.5 concentration of 25 micrograms per cubic metre over a 24 hour averaging period;
- 1.2.2 ensure any notification provided under sub paragraph 1 of this condition includes but is not limited to:
- a the date;
 - b the cause;
 - c the measured particulate concentration over the 24 hour averaging period; and
 - d remedial actions taken to reduce particulate emissions from the Premises.

1.3 PARTICULATE EMISSIONS - KILN STACK 4A (U - 1550)

The Licensee must:

- 1.3.1 take all reasonable and practicable measures to prevent particulate emissions (as TSP) from Kiln Stack 4A exceeding a limit of 80 milligrams per cubic metre at STP, dry basis, based on a 1 hour average;
- 1.3.2 where particulate emissions exceed the limit specified under sub paragraph 1 of this condition, take all reasonable and practicable immediate action to reduce particulate emissions to below that limit;
- 1.3.3 provide notification to the EPA as soon as reasonably practicable of any exceedance of the limit specified under sub paragraph 1 of this condition and include the reason(s) for the exceedance, and the corrective actions implemented to reduce particulate emissions to below that limit.

1.4 PARTICULATE EMISSIONS - PRECALCINER STACK 4B (U - 1565)

The Licensee must:

- 1.4.1 take all reasonable and practicable measures to prevent particulate emissions (as TSP) from Precalciner Stack 4B exceeding a limit of 50 milligrams per cubic metre at STP, dry basis, based on a 1 hour average;

- 1.4.2 where particulate emissions exceed the limit specified under sub paragraph 1 of this condition, take all reasonable and practicable immediate action to reduce particulate emissions to below that limit;
- 1.4.3 provide notification to the EPA as soon as reasonably practicable of any exceedance of the limit specified under sub paragraph 1 of this condition and include the reason(s) for the exceedance, and the corrective actions implemented to reduce particulate emissions to below that limit.

1.5 PREMISES STORMWATER MANAGEMENT (S - 160)

The Licensee must:

- 1.5.1 take all reasonable and practicable measures to prevent contamination of stormwater resulting from prescribed activities undertaken at the Premises; and
- 1.5.2 implement appropriate contingency measures to contain the contaminated stormwater at the Premises unless and until the contaminated stormwater is treated to remove the contamination, or is disposed of at an appropriately licensed facility.

1.6 SITE NOISE MINIMISATION (U - 1551)

The licensee must:

- 1.6.1 take all reasonable and practicable measures to minimise noise generated at the Premises;
- 1.6.2 develop a Noise Management Plan to the satisfaction of the EPA by the compliance date listed below;
- 1.6.3 ensure that the Noise Management Plan includes but need not be limited to:
 - a detailed action and response strategies that will be undertaken by the Licensee to prevent and minimise noise generated at the Premises;
 - b a methodology and framework for providing public access to the Noise Management Plan (or any revised plan approved by the EPA) and to quarterly and annual reporting;
- 1.6.4 submit a quarterly report to the EPA by the 15th day of February, May, August and November of each year that includes but need not be limited to:
 - a a summary of action and response strategies undertaken during the quarter to minimise noise generated at the Premises;
 - b a review and analysis of noise related complaints received and recorded during the quarter pursuant to condition U-1553;

- 1.6.5 submit an annual report to the EPA by the 15th of February of each year, that includes but need not be limited to:
 - a a review of the effectiveness of all action and response strategies identified pursuant to this condition;
 - b a review and analysis of noise related complaints received and recorded pursuant to condition U-1553;
 - c identification of potential opportunities for improvement in noise management at the Premises; and
- 1.6.6 implement the Noise Management Plan approved in writing by the EPA (or any revised plan approved in writing by the EPA).

Compliance Date: 30-Jun-2023

1.7 WASTEWATER (S - 18)

The Licensee must take all reasonable and practicable measures to prevent wastewater or contaminated stormwater from discharging onto land and/or into waters.

2 WASTE MANAGEMENT

2.1 LISTED WASTE AND/OR CONTROLLED WASTE PRODUCER (S - 166)

The Licensee must:

- 2.1.1 prior to the interstate transport of any waste specified in the Listed Waste attachment and/or Controlled Waste attachment to this licence, obtain a Consignment Authorisation from the relevant authority in the state or territory of destination of that waste;
- 2.1.2 ensure a WTC is generated for any waste specified in the Listed Waste and/or Controlled Waste attachments to this licence before that waste is transported to a Destination Facility in South Australia or interstate;
- 2.1.3 provide a copy or copies of the WTC to the transporter of the waste and the EPA; and
- 2.1.4 retain a copy of all manually generated WTC's for not less than 12 months.

3 OPERATIONAL MANAGEMENT

3.1 ALTERNATIVE FUEL AND/OR RAW MATERIAL MANAGEMENT (U - 703)

The Licensee must:

- 3.1.1 ensure that the only types of AFRM to be burned in the industrial fuel burning equipment on the Premises are those defined in Schedule X-1 of this licence, at the approved rates identified in that schedule;
- 3.1.2 ensure that where the AFRM is a Refuse Derived Fuel (RDF), only receive RDF which complies with a Recovered Products Plan approved by the EPA in writing;

- 3.1.3 provide public access to the Recovered Products Plan (or any revised plan approved by the EPA);
- 3.1.4 comply with the requirements of sub paragraphs 1 and 2 of this condition, except during the events of trial burning of AFRM in the industrial fuel burning equipment on the Premises whereby the trial is undertaken in accordance with Schedule W-1 of this licence.

3.2 ALTERNATIVE FUELS - OPERATIONAL REQUIREMENTS (U - 725)

The Licensee must ensure that:

- 3.2.1 all alternative fuels listed in Schedule X-1 of this licence are:
 - a completely combusted in a certified Type B gas appliance;
 - b not admitted into the certified Type B gas appliance during start-up, shut-down, or where the gas flame is not under stable operating conditions;
- 3.2.2 the following parameters are monitored and recorded whenever alternative fuels listed in Schedule X-1 of this licence are used:
 - a the alternative fuel type and usage rate;
 - b the temperature in degrees Celcius of the combustion gases exiting the Type B gas appliance;
 - c the composition of the combustion gases exiting the Type B gas appliance, including but not limited to the percentage of oxygen, carbon monoxide and methane;
 - d the temperature in degrees Celcius of the combustion gases entering the electrostatic precipitators;
- 3.2.3 records relating to this condition are kept for the term of the Licence, and are made available to an Authorised Officer upon request.

3.3 CLEAN UP OF SPILLS (S - 218)

The Licensee must, as soon as practicable, cause any material spilt onto the wharf, dock, loading or work area to be removed and reused, or disposed of to an appropriately licensed facility.

NOTES

Material is as described in Clause 7(1) of Schedule 1 of the Environment Protection Act 1993.

3.4 COMMUNITY ENGAGEMENT PLAN (U - 1552)

The Licensee must:

- 3.4.1 develop and implement a Community Engagement Plan in consultation with key stakeholders; and

- 3.4.2 provide public access to the Community Engagement Plan (and any subsequent amended version) by the compliance date listed below.

Compliance Date: 31-Mar-2023

3.5 COMPLAINTS REGISTER (U - 1553)

The Licensee must:

- 3.5.1 prepare and maintain a register of all complaints received concerning environmental issues that includes:
- a the date and time that the complaint was made;
 - b details of the complaint, including the likely cause of the events giving rise to the complaint;
 - c the contact details of the complainant (if permitted by the complainant);
 - d an estimate of the temperature, wind speed, wind direction and rainfall at the time of the events giving rise to the complaint;
 - e the date, time and details of any action taken by the Licensee in response to the complaint and to prevent a recurrence of the events giving rise to the complaint;
- 3.5.2 respond to the complainant within 72 hours; and
- 3.5.3 ensure that a summary report of complaints received is made publically available.

3.6 EMERGENCY SPILL KIT (S - 22)

The Licensee must ensure that an appropriate emergency spill kit is kept on the Premises at all times in locations where listed wastes are stored, loaded or unloaded and is appropriately used in the event of a spill.

3.7 ENVIRONMENT IMPROVEMENT PROGRAMME (U - 1554)

The Licensee must:

- 3.7.1 develop and submit to the EPA an Environment Improvement Programme (EIP) to the satisfaction of the EPA by the compliance date listed below;
- 3.7.2 undertake public consultation in the course of developing the EIP;

- 3.7.3 ensure that the EIP includes, but need not be limited to:
- a a summary of the results of public consultation undertaken in the course of developing the EIP;
 - b detailed actions, timeframes and milestones to be undertaken by the Licensee to fully implement the preferred noise mitigation option(s) identified pursuant to condition U-1559 of this licence;
 - c detailed actions, timeframes and milestones to be undertaken by the Licensee to fully implement the preferred air particulate mitigation option(s) identified pursuant to condition U-1560 of this licence;
 - d a methodology and framework for reporting to the EPA, including frequency, to demonstrate progression and completion of the EIP actions;
 - e a methodology and framework to assess the effectiveness of the actions detailed in the EIP; and
 - f a methodology and framework for providing public access to the EIP, quarterly and annual reporting;
- 3.7.4 implement the EIP upon approval in writing by the EPA.

Compliance Date: 28-Feb-2024

3.8 IMPLEMENT APPROVED DOCUMENTS (U - 1568)

The Licensee must implement the following approved documents:

- 3.8.1 Environment Improvement Programme, Document Number 1126 EIP Version 7, 26 August 2021 (approved by the EPA on 15 October 2021)
- 3.8.2 Dust Management Plan, June 2018 (approved by the EPA on 27 June 2018);
- 3.8.3 Ground Level Particulate Monitoring and Reporting Plan, June 2018 (approved by the EPA on 18 June 2018);
- 3.8.4 Noise Management Plan, August 2018 (approved by the EPA on 16 August 2018); and
- 3.8.5 Stack Particulate Management Plan, June 2018 (approved by the EPA on 18 June 2018).

NOTES

NOTE - Each document specified in this condition must be implemented by the Licensee until the EPA's approval of equivalent documents pursuant to conditions U-1554, U-1549, U-1555, U-1551 and U-1556.

3.9 MINAMATA CONVENTION ON MERCURY (U - 1571)

The Licensee must ensure that mercury emissions are assessed, controlled and, where feasible, reduced, consistent with the Minamata Convention on Mercury, where changes to site operating processes are proposed, that:

- 3.9.1 have the potential to increase or alter the nature of mercury emissions generated by the Licensee;
- 3.9.2 have the potential to increase the risk of environmental harm; or

- 3.9.3 would relocate the point of discharge of mercury emissions at the Premises.

3.10 POLLUTION CONTROL EQUIPMENT REGISTER (S - 2)

The Licensee must:

- 3.10.1 maintain all Pollution Control Equipment to ensure that pollution is minimised; and
- 3.10.2 keep a written record of all inspections of Pollution Control Equipment, which includes:
- a the name of the recording officer;
 - b the date of each inspection of the equipment;
 - c details of the equipment that was inspected;
 - d an assessment of whether the equipment was working effectively; and
 - e the action taken (if required) to rectify any faults or failures.

4 MONITORING AND REPORTING

4.1 AIR POLLUTANT EMISSIONS INVENTORY (U - 1566)

The Licensee must:

- 4.1.1 engage a suitably qualified expert to:
- a undertake an assessment of air pollutants emitted from all sources at the Premises;
 - b prepare a comprehensive air pollutant emissions inventory for the Premises;
- 4.1.2 develop and submit a report to the satisfaction of the EPA, by the compliance date listed below, which includes but need not be limited to:
- a the methodology, parameters and assumptions used in undertaking the detailed assessment of air pollutants pursuant to paragraph 1 of this condition; and
 - b the results of the detailed assessment of air pollutants undertaken pursuant to paragraph 1 of this condition with reference to the requirements of the Environment Protection (Air Quality) Policy 2016; and
 - c a comprehensive air pollutant emissions inventory.

NOTES

The EPA will assess the suitability of the engaged expert against the EPA's 'Ambient Air Quality Assessment' Guideline

Compliance Date: 30-Jun-2023

4.2 ASSESSMENT OF AIR PARTICULATE MITIGATION OPTIONS (U - 1560)

The Licensee must:

- 4.2.1 engage a suitably qualified expert to:
- a undertake a detailed assessment of options that can be undertaken to prevent or minimise particulate emissions from the Premises;
 - b determine the predicted effectiveness of the options assessed under paragraph 1 of this condition, with reference to the air pollutant emissions inventory prepared in accordance with condition U-1566;
- 4.2.2 develop and submit a report to the satisfaction of the EPA, by the compliance date listed below, which includes but need not be limited to:
- a the details of, and predicted environmental outcomes and effectiveness of, the option(s) assessed under paragraph 1 of this condition;
 - b a feasibility assessment of each option(s) including the methodology used, considerations made and clear rationale for selection of the Licensee's preferred option(s);
 - c the intended timeframe(s) to be taken to implement the preferred option(s).

NOTES

The EPA will assess the suitability of the engaged expert against the EPA's 'Ambient Air Quality Assessment' Guideline

Compliance Date: 30-Dec-2023

4.3 ASSESSMENT OF NOISE MITIGATION OPTIONS (U - 1559)

The Licensee must:

- 4.3.1 engage a suitably qualified Acoustic Engineer to identify and assess noise mitigation options that effectively minimise noise emissions from the Premises;
- 4.3.2 develop and submit a report to the satisfaction of the EPA, by the compliance date listed below, which includes but need not be limited to:
- a details of the assessment of noise mitigation options undertaken pursuant to paragraph 1 of this condition;
 - b noise modelling, prepared by a suitably qualified Acoustic Engineer, which includes the predicted effectiveness of each noise mitigation option assessed;
 - c identification of the Licensee's preferred noise mitigation option(s);
 - d the methodology used, considerations made and clear rationale for selection of the Licensee's preferred noise mitigation option(s); and
 - e intended timeframe(s) for implementation of the Licensee's preferred noise mitigation option(s).

Compliance Date: 30-May-2023

4.4 GROUND LEVEL PARTICULATE MONITORING AND REPORTING PLAN (U - 1555)

The Licensee must:

- 4.4.1 develop and submit to the satisfaction of the EPA by the compliance date listed below a Ground Level Particulate Monitoring and Reporting Plan;
- 4.4.2 ensure that the Ground Level Particulate Monitoring and Reporting Plan includes, but need not be limited to:
 - a measurement and monitoring of ground level particulate concentrations (as TSP, PM10 and PM2.5) at various locations within the Premises and outside the Premises;
 - b a methodology and framework for the provision of public access to real-time monitoring data of PM10 and PM2.5 from monitoring stations located outside the Premises;
 - c a methodology for providing public access to an explanation within 48 hours of why the following particulate limits are exceeded at monitoring locations outside the Premises;
 - i a PM10 concentration of 50 micrograms per cubic metre over a 24 hour averaging period; and
 - ii a PM2.5 concentration of 25 micrograms per cubic metre over a 24 hour averaging period;
 - d a methodology and framework for providing public access to the Ground Level Particulate Monitoring and Reporting Plan (or any revised plan approved by the EPA) and to quarterly and annual reporting;
- 4.4.3 submit a quarterly report to the EPA by the last day of January, April, July and October of each year;
- 4.4.4 submit an annual report to the EPA by the last day of October of each year; and
- 4.4.5 implement the Ground Level Particulate Monitoring and Reporting Plan approved in writing by the EPA (or any revised plan approved in writing by the EPA).

Compliance Date: 30-Jun-2023

4.5 NITROGEN DIOXIDE MONITORING AND REPORTING PLAN (U - 1641)

The Licensee must:

- 4.5.1 develop and submit, to the satisfaction of the EPA, by the compliance date listed below, a Nitrogen Dioxide Monitoring and Reporting Plan;

- 4.5.2 ensure that the Nitrogen Dioxide Monitoring and Reporting Plan includes, but need not be limited to:
- a a methodology and framework for measurement and monitoring of nitrogen dioxide at a location within the residential community adjacent to the Premises;
 - b proposed timeframes and duration of nitrogen dioxide measurement and monitoring;
 - c a methodology and framework for reporting to the EPA, including frequency, that includes but need not be limited to results of nitrogen dioxide monitoring and a comparison of monitoring results with the maximum ground level nitrogen dioxide concentration levels specified in Schedule 2 of the Environment Protection (Air Quality) Policy, 2016
 - d a methodology and framework for the provision of public access to the Nitrogen Dioxide Monitoring and Reporting Plan (or any revised Plan approved in writing by the EPA) and to reports developed pursuant to the Plan;
- 4.5.3 implement the Nitrogen Dioxide Monitoring and Reporting Plan approved in writing by the EPA (or any revised plan approved in writing by the EPA) until the completion of the monitoring and reporting requirements specified in the Plan.

Compliance Date: 29-Dec-2023

4.6 STACK EMISSION TESTING (U - 748)

The Licensee must:

- 4.6.1 test emissions from all exhaust stacks, by the last day of April and October of each year for the following:
- a substances included in Schedule Y-1 of this licence;
 - b temperature;
 - c moisture;
 - d pressure; and
 - e exhaust velocity
- 4.6.2 ensure that the emission testing programme is undertaken when the plant is under stable operating conditions;
- 4.6.3 carry out the emission testing programme in accordance with the methods specified in the EPA document entitled 'Emission Testing Methodology for Air Pollution Manual version 2', dated August 2012; and

- 4.6.4 submit a report to the EPA within 90 days after the conclusion of the emission testing programme, which includes but is not limited to:
- a an assessment of whether the tested emissions comply with Schedule Y-1 of this licence;
 - b the type and mass feed rate of any utilised alternative fuels and/or raw materials listed under Schedule X-1 of this licence that were used during the testing that is required under sub paragraph 1 of this condition; and
 - c how the requirements outlined in Section 2.6 of the EPA document entitled 'Emission Testing Methodology for Air Pollution Manual version 2', dated August 2012 were complied with.

4.7 STACK PARTICULATE MANAGEMENT PLAN (U - 1556)

The Licensee must:

- 4.7.1 develop and submit a Stack Particulate Management Plan to the satisfaction of the EPA by the compliance date listed below;
- 4.7.2 ensure that the Stack Particulate Management Plan includes, but need not be limited to:
- a details of continuous monitoring of particulate emissions from Kiln Stack 4A and Precalciner Stack 4B in accordance with the EPA document entitled "Emission Testing Methodology for Air Pollution Manual Version 2" dated August 2012;
 - b details regarding calibration, to ensure that the continuous monitors are calibrated in accordance with Appendix B of the EPA document entitled "Emission Testing Methodology for Air Pollution Manual Version 2" dated August 2012;
 - c details of the actions that will be taken by the Licensee when stack particulate emissions exceed the limits specified in conditions U-1550 and U-1565;
 - d a methodology and framework for providing public access to the Stack Particulate Management Plan (or any revised plan approved by the EPA) and to quarterly and annual reporting;
- 4.7.3 submit quarterly reports to the EPA on the last day of January, April, July and October of each year. Ensure that the quarterly reports include, but need not be limited to:
- a a summary of all exceedance notifications made to the EPA pursuant to conditions U-1550 and U-1565, including:
 - i the date, time and duration;
 - ii the cause;
 - iii the measured particulate concentration;
 - iv immediate actions taken to reduce particulate emissions;
 - v corrective actions taken to prevent future events of the same kind; and
 - vi reporting of particulate concentrations as milligrams per cubic metre at STP, dry basis;

- 4.7.4 submit an annual report to the EPA on the last day of October of each year, which includes but need not be limited to:
- a a trend analysis of notifications and associated details provided under sub paragraph 3 of this condition;
 - b a trend comparison of information analysed under sub paragraph 4(a) of this condition with:
 - i community complaints recorded under condition U-1553; and
 - ii the preceding 12 months of stack emission data;
 - c identification of any opportunities for improvement in order to decrease the frequency, duration and magnitude of any notified events; and
- 4.7.5 implement the Stack Particulate Management Plan approved in writing by the EPA (or any revised plan approved in writing by the EPA).

NOTES

The Licensee must ensure that any exceedence event that results in environmental harm as defined under Sections 79 and 80 of the Environment Protection Act 1993, is notified pursuant to Section 83 of the Environment Protection Act 1993.

Compliance Date: 31-May-2023

4.8 TOTAL SUSPENDED PARTICULATE (TSP) COMMUNITY ASSESSMENT (U - 1562)

The Licensee must:

- 4.8.1 develop and submit a plan, to the satisfaction of the EPA, by the compliance date listed below, which includes but need not be limited to:
- a a methodology and framework for a TSP community assessment to be undertaken by the Licensee that ensures that the nature and composition of TSP material at locations within the residential community adjacent to the Premises is assessed by the Licensee;
 - b a methodology and framework that ensures that the TSP community assessment includes a comparison and correlation of materials used at, and emissions from, the Premises with the nature and composition of TSP material assessed at locations within the residential community adjacent to the Premises; and
 - c proposed timeframes and duration of the TSP community assessment.

Compliance Date: 30-Jun-2023

5 ADMINISTRATION

5.1 ANNUAL RETURN AND PAYMENT OF ANNUAL FEES (A - 4)

For the purposes of section 48(2)(a) of the Act, the date in each year for the lodgement of the Annual Return is no later than 90 days before the anniversary of the grant or renewal of the Licence; and

- 5.1.1 For the purposes of section 48(2)(b) of the Act, the date in each year for the payment of Annual Authorisation Fee is the anniversary of the grant of the Licence.

5.2 APPROVAL OF OPERATING PROCESSES (A - 6)

The Licensee must not undertake changes to operating processes conducted pursuant to the Licence at the Premises without written approval from the EPA, where such changes:

- 5.2.1 have the potential to increase emissions or alter the nature of pollutants or waste currently generated by, or from the licensed activity; or
- 5.2.2 have the potential to increase the risk of environmental harm; or
- 5.2.3 would relocate the point of discharge of pollution or waste at the Premises.

5.3 APPROVAL OF WORKS (A - 5)

The Licensee must not construct or alter a building or structure, or install or alter any plant or equipment, for use of an activity undertaken pursuant to the Licence at the Premises without written approval from the EPA, where such changes:

- 5.3.1 have the potential to increase the emissions or alter the nature of pollutants or waste currently generated by, or from the licensed activity; or
- 5.3.2 have the potential to increase the risk of environmental harm; or
- 5.3.3 would relocate the point of discharge of pollution or waste at the Premises.

5.4 CHANGE OF LICENSEE DETAILS (A - 3)

If the Licensee's name or postal address (or both) changes, the Licensee must inform the EPA within 28 days of the change occurring.

5.5 IMPOSE OR VARY CONDITIONS (U - 1567)

The EPA may, at any time during the term of this licence, impose new conditions on this licence or vary the conditions of this licence by notice in writing to the licensee. Conditions may be imposed, or varied, in response to the EPA's receipt of any of the following plans or reports, or information supplied to the EPA pursuant to any of the following plans or reports:

- 5.5.1 air particulate management plan and its reports (Condition U-1549);
- 5.5.2 ground level particulate monitoring data and information (Condition U-765)
- 5.5.3 ground level monitoring plan and its reports (Condition U-1555)
- 5.5.4 stack monitoring data and information (Conditions U-1550, U-1565, U-748)
- 5.5.5 stack management plan and its reports (Condition U-1556)

- 5.5.6 noise management plan and its reports (Condition U-1551)
- 5.5.7 Environment Improvement Programme (EIP) and its reports (Condition U-1554)
- 5.5.8 noise mitigation options assessment report (Condition U-1559)
- 5.5.9 air pollutant emissions inventory (Condition U-1566)
- 5.5.10 air particulate mitigation options assessment report (Condition U-1560)
- 5.5.11 TSP community assessment report (Condition U-1562)

5.6 LICENCE RENEWAL (A - 2)

For the purposes of section 43(3) of the Act, an application for Renewal of the Licence must be made no later than 90 days before the expiry date of the Licence.

5.7 OBLIGATIONS TO EMPLOYEES, AGENTS AND CONTRACTORS (A - 1)

The Licensee must ensure that every employee, agent or contractor responsible for undertaking any activity regulated by the Licence, is informed as to the conditions of the Licence.

LISTED WASTE.pdf"

SCHEDULE Y-1.pdf"

SCHEDULE W-1.pdf"

Schedule X1_Sept2023.pdf"

Controlled Waste Attachment

Controlled Waste

– per the National Environment Protection (Movement of Controlled Waste between States and Territories) Measure 1998, requiring provision of Waste Transport Certificate (WTC) from State or Territory where waste originates

Waste stream or wastes having as constituents:

Acidic solutions or acids in solid form
Animal effluent and residues (abattoir effluent, poultry and fish processing waste)
Antimony; antimony compounds
Arsenic; arsenic compounds
Asbestos
Barium compounds (excluding barium sulphate)
Basic solutions or bases in solid form
Beryllium; beryllium compounds
Boron compounds
Cadmium; cadmium compounds
Ceramic-based fibres with physico-chemical characteristics similar to those of asbestos
Chlorates
Chromium compounds (hexavalent and trivalent)
Clinical and related wastes
Cobalt compounds
Containers which are contaminated with residues of substances referred to in this list
Copper compounds
Cyanides (inorganic)
Cyanides (organic)
Cyanides (organic) / nitriles
Encapsulated, chemically-fixed, solidified or polymerised wastes referred to in this list
Ethers
Filter cake contaminated with residues of substances referred to in this list
Fire debris and fire washwaters
Fly ash, excluding fly ash generated from Australian coal fired power stations
Grease trap waste
Halogenated organic solvents
Highly odorous organic chemicals (including mercaptans and acrylates)
Inorganic fluorine compounds excluding calcium fluoride
Inorganic sulfides
Isocyanate compounds
Lead; lead compounds
Mercury; mercury compounds
Metal carbonyls
Nickel compounds
Non-toxic salts

Controlled Waste Licence Attachment (continued)

– per the National Environment Protection (Movement of Controlled Waste between States and Territories) Measure 1998, requiring provision of Waste Transport Certificate (WTC) from State or Territory where waste originates

Waste stream or wastes having as constituents:

Organic phosphorus compounds
Organic solvents excluding halogenated solvents
Organohalogen compounds - other than substances referred to in this list
Oxidising agents
Perchlorates
Phenols, phenol compounds including chlorophenols
Phosphorus compounds excluding mineral phosphates
Polychlorinated dibenzo-furan (any congener)
Polychlorinated dibenzo-p-dioxin (any congener)
Reactive chemicals
Reducing agents
Residues from industrial waste treatment/disposal operations.
Selenium; selenium compounds
Soils contaminated with a controlled waste
Surface active agents (surfactants), containing principally organic constituents and which may contain metals and inorganic materials
Tannery wastes (including leather dust, ash, sludges and flours)
Tellurium, tellurium compounds
Thallium; thallium compounds
Triethylamine catalysts for setting foundry sands
Tyres
Vanadium compounds
Waste chemical substances arising from research and development or teaching activities including those which are not identified and/or are new and whose effects on human health and/or the environment are not known
Waste containing peroxides other than hydrogen peroxide
Waste from heat treatment and tempering operations containing cyanides
Waste from the manufacture, formulation and use of wood-preserving chemicals
Waste from the production, formulation and use of biocides and phytopharmaceuticals
Waste from the production, formulation and use of inks, dyes, pigments, paints, lacquers and varnish
Waste from the production, formulation and use of organic solvents
Waste from the production, formulation and use of photographic chemicals and processing materials
Waste from the production, formulation and use of resins, latex, plasticisers, glues and adhesives
Waste from the production and preparation of pharmaceutical products
Waste mineral oils unfit for their original intended use
Waste oil/water, hydrocarbons/water mixtures or emulsions
Waste pharmaceuticals, drugs and medicines
Waste resulting from surface treatment of metals and plastics
Waste tarry residues arising from refining, distillation, and any pyrolytic treatment
Waste, substances and articles containing or contaminated with polychlorinated biphenyls (PCBs), polychlorinated naphthalenes (PCNs), polychlorinated terphenyls (PCTs) and/or polybrominated biphenyls (PBBs)
Waste of an explosive nature not subject to other legislation
Wool scouring waste
Zinc compounds

Listed Waste Attachment

Listed Waste

– per part B of Schedule 1 to the Environment Protection Act 1993, requiring provision of Waste Transport Certificate (WTC) for all transport movements

Waste stream or wastes having as constituents:

- Acids and acidic solutions
 - Adhesives (excluding solid inert polymeric materials)
 - Alkali metals and alkaline earth metals
 - Alkalis and alkaline solutions
 - Antimony and antimony compounds and solutions
 - Arsenic and arsenic compounds and solutions
 - Asbestos
 - Barium compounds and solutions
 - Beryllium and beryllium compounds
 - Boron and boron compounds
 - Cadmium and cadmium compounds and solutions
 - Calcium carbide
 - Carbon disulphide
 - Carcinogens teratogens and mutagens
 - Chlorates
 - Chromium compounds and solutions
 - Copper compounds and solutions
 - Cyanides or cyanide solutions and cyanide complexes
 - Cytotoxic wastes
 - Dangerous substances within the meaning of the *Dangerous Substances Act 1979*
 - Distillation residues
 - Fluoride compounds
 - Halogens
 - Heterocyclic organic compounds containing oxygen, nitrogen or sulphur
 - Hydrocarbons and their oxygen, nitrogen and sulphur compounds (including oils)
 - Isocyanate compounds (excluding solid inert polymeric materials)
 - Laboratory chemicals
 - Lead compounds and solutions
 - Lime sludges or slurries
 - Manganese compounds
 - Medical waste consisting of—
 - (a) a needle, syringe with needle, surgical instrument or other article that is discarded in the course of medical*, dental or veterinary practice or research and has a sharp edge or point capable of inflicting a penetrating injury on a person who comes into contact with it; or
 - (b) human tissue, bone, organ, body part or foetus; or
 - (c) a vessel, bag or tube containing a liquid body substance; or
 - (d) an animal carcass discarded in the course of veterinary or medical* practice or research; or
 - (e) a specimen or culture discarded in the course of medical*, dental or veterinary practice or research and any material that has come into contact with such a specimen or culture; or
 - (f) any other article or matter that is discarded in the course of medical*, dental or veterinary practice or research and that poses a significant risk to the health of a person who comes into contact with it.
- medical practice** includes the practice of pathology and the operation of an immunisation clinic.

Listed Waste Licence Attachment

– *per part B of Schedule 1 to the Environment Protection Act 1993, requiring provision of Waste Transport Certificate (WTC) for all transport movements*

Waste stream or wastes having as constituents (*continued*):

Mercaptans

Mercury compounds and equipment containing mercury

Nickel compounds and solutions

Nitrates

Organic halogen compounds (excluding solid inert polymeric materials)

Organic phosphates

Organic solvents

Organometallic residues

Oxidising agents

Paint sludges and residues

Perchlorates

Peroxides

Pesticides (including herbicides and fungicides)

Pharmaceutical wastes and residues

Phenolic compounds (excluding solid inert polymeric materials)

Phosphorus and its compounds

Polychlorinated biphenyls

Poisons within the meaning of the *Drugs Act 1908*

Reactive chemicals

Reducing agents

Selenium and selenium compounds and solutions

Silver compounds and solutions

Solvent recovery residues

Sulphides and sulphide solutions

Surfactants

Thallium and thallium compounds and solutions

Vanadium compounds

Zinc compounds and solutions

Schedule W-1

Schedule W-1 AFRM Trial Management

Adelaide Brighton Cement Ltd – EPA Environmental Authorisation 1126

W-1.1 Pre-Trial Report

The Licensee must:

1. prepare a pre-trial report for the use of AFRM, which must contain, but not be limited to, the following:
 - 1.1 demonstration of beneficial purposes;
 - 1.2 demonstrated support for the waste management hierarchy, as outlined in the Environment Protection (Waste to Resources) Policy 2010;
 - 1.3 the purpose of the trial;
 - 1.4 the physical and chemical specifications of the AFRM;
 - 1.5 an assessment of the risks associated with the use of the AFRM and risk mitigating measures including, but not limited to:
 - 1.5.1 the predicted mass balance of the AFRM including predicted emissions to air and baseline emissions for comparison;
 - 1.5.2 the results of previous stack emissions testing using the AFRM, if available; and
 - 1.5.3 any risks associated with on-site storage, handling and feed into the process.
 - 1.6 tests proposed to be undertaken during the trial (for example stack emissions testing, including the analytes to be tested);

Note: It is recommended that, as a minimum, the stack emissions testing is consistent with licence condition U-748. If the Licensee proposes to exclude any of the analytes and properties in licence condition U-748 from testing, the Licensee must highlight this and provide justification in the pre-trial report for EPA approval.
 - 1.7 records to be kept and duration that records will be kept during and after the trial; and
 - 1.8 the proposed dates for trial commencement and completion;
2. submit the pre-trial report to the EPA, at least 30 days before the commencement of a trial, for approval.
3. if the pre-trial report submitted in accordance with paragraph 2 is not acceptable to the EPA, resubmit a revised version of the pre-trial report (incorporating any additions or alterations that are required by the EPA) within the time period advised by the EPA in writing.

W-1.2 Trial Record

The Licensee must:

1. keep a record at the Premises of the details listed in the pre-trial report and any records required by EPA condition of approval.
2. ensure that the records, described in paragraph 1 hereof, are made available to an Authorised Officer upon request at any time during or after the trial taking into account the duration that records will be retained as specified in the pre-trial report.

Schedule W-1 AFRM Trial Management (continued)

Adelaide Brighton Cement Ltd – EPA Environmental Authorisation 1126

W-1.3 Post-Trial Report - Summary of AFRM Trial

The Licensee must:

1. prepare a post-trial report 'Summary of AFRM Trial' including, but not limited to, the following information:
 - 1.1 the total quantity of AFRM used during the trial;
 - 1.2 the dates and times when the trial commenced and concluded;
 - 1.3 the results of stack emissions testing for the analytes and properties specified in any relevant pre-trial reports and baseline emissions for comparison, where applicable;
 - 1.4 a final proposed chemical and physical specification of the material based on the trial results; and
 - 1.5 an assessment of the suitability of the AFRM for ongoing use.
2. submit the 'Summary of AFRM trial' post -trial report to the EPA within 90 days of the completion of each trial, within 30 days after receipt of stack emissions or modelling results, whichever is greater.
3. if the post-trial report submitted in accordance with paragraph 2 is not acceptable to the EPA, resubmit a revised version of the post-trial report (incorporating any additions or alterations that are required by the EPA) within the time period advised by the EPA in writing.

W-1.4 Post-Trial Report - Summary of AFRM Trial

If the AFRM has been found to be suitable for ongoing use, the Licensee must:

1. prepare a post-trial report 'Request for Ongoing Use of AFRM' for EPA approval. The Report must contain, but is not limited to, the following information:
 - 1.1 demonstration of beneficial purposes;
 - 1.2 demonstrated support for the waste management hierarchy as outlined in the Environment Protection (Waste to Resources) Policy 2010; and
 - 1.3 an assessment of the risks associated with the use of the AFRM and risk mitigating measures including, but not limited to:
 - 1.3.1 the results of stack emissions testing for the analytes and properties specified in any relevant pre-trial reports and baseline emissions for comparison;
 - 1.3.2 air dispersion modelling and ground level concentrations for each substance analysed, as specified in any relevant pre-trial reports, as well as ground level concentrations for baseline emissions for comparison;
 - 1.3.3 any risks associated with on-site storage and handling; and
 - 1.3.4 any relevant complaints or enquiries received during the trial.
2. submit the 'Request for ongoing use of AFRM' post -trial report to the EPA at least 60 days before requiring approval.
3. if the post-trial report submitted in accordance with paragraph 2 is not acceptable to the EPA, resubmit a revised version of the post-trial report (incorporating any additions or alterations that are required by the EPA) within the time period advised by the EPA in writing.

Note 1: Where any 'ARFM' to be trialed fits the definition of 'refuse derived fuel', the EPA 'Standard for the production and use of refuse derived fuel' dated February 2010 is also considered to apply.

Note 2: In the event that any AFRM proposal fits the criteria specified in Schedule W-1 and a request for the ongoing use is to be sought a submission to the EPA under Conditions A-5 and/or A-6 of this licence is required.

Schedule X-1

Schedule X-1

Adelaide Brighton Cement Ltd – EPA Environmental Authorisation 1126

AFRM	Approved Feed Rate
Carbon Powder (processed anodes)	Maximum – 2.5 tonnes per hour
Refuse Derived Fuel	32 tonnes per hour (Note: Maximum 20% plastic contamination by weight)
Black Sand (processed Blast Furnace Slag)	Maximum – 20 tonnes per hour
Blast Furnace Slag (processed from One Steel)	Maximum – 15 tonnes per hour
Blended Mill Scale (iron oxide by-product from the recycling of scrap steel)	Maximum – 15 tonnes per hour
Alox	Maximum 1 tonne per hour
Used Foundry Sand	Maximum – 4 tonnes per hour
